Silverado Contractors, Inc.
Their Fourth Link-Belt Excavator

Silverado Contractors, Inc. has recently taken title to this Link-Belt LBX 330LX hydraulic excavator. This 78,000 lb. machine is one of four Link-Belt excavators that the company has purchased from Western Traction II. "We carefully evaluated all the competition," reports Silverado's Joe Capriola, "and we chose the Link-Belt and Western Traction II." Shown above, their newest 330LX is completing the Keyser Hall Demolition project at Tamalpais High School in Marin County. Silverado Contractors, Inc., based in Oakland, is one of California's leading demolition contractors, professionally completing projects throughout the San Francisco Bay Area on time and on budget. For a demolition quote, contact Silverado Contractors, Inc. at (510) 658-9960. For the best demolition and excavation equipment, your first call should be Western Traction II. We're Northern California's factory-authorized Link-Belt LBX Excavator Distributor.
