A Machine Like No Other. Well, Actually, Like Three Others.

The new XT1600 is three machines in one: a backhoe loader, mini excavator, and skid steer. Like its forerunner the XT850, it has a 260° excavator sweep that lets you dig at extraordinary angles in tight spots. And with 30 net hp to the tool carrier, it can run most full-size skid steer attachments—so you can tackle any size construction or cleanup job. For details, give us a call or visit ditchwitch.com.
